Experience:

Meijer, Service Area Leader/Store Director in Charge, 2016-Present

- Drove successful software issue resolutions by synergizing with IT support teams, showcasing adeptness in navigating both intricate system architectures and complex business needs.
- Played a key role in vendor relations and project management, including the coordination of technology deployment.
- Led cross-functional teams for over 8 years, to improve departmental efficiency and customer satisfaction.

Owner, Will Fix It, 2009-Present

- Owned and operated a small business that developed full-stack web applications and provided computer repair, maintenance, and troubleshooting services for personal and small business clients.
- Installed and configured hardware and software, including operating systems and smart home devices.

Projects:

- Built full stack web application with a Node.js, Express, and Python backend, and a React.js and Bootstrap frontend.
- Created a database system for a small business client to manage their inventory using MySQL, MongoDB, and FireStore.
- Developed a web-based application for a personal project using Vue.js and Firebase.
